(a) Type of AoA error
XGBoost
Random Forest
Error reduction vs. $h = 0$ (m)
4
3
2
1
0
−1
Report 4° + 5°
Exact AoA
5° steps only
4° noise only
8° + 5°
(b) Persistence of the error
Neural models (mean and range of 4)
XGBoost
Random Forest
Error reduction vs. $h = 0$ (m)
0
0.5
0.9
0.99
Correlation of AoA error between successive reports
